📍 Dhaka, Bangladesh

ABOUT ME

Dedicated and passionate Full-Stack Developer specializing in MERN stack technologies with hands-on experience in building scalable web applications. Currently pursuing Bachelor's degree while actively developing comprehensive full-stack solutions featuring modern frameworks and secure authentication systems. Proven ability to create user-centric applications with robust backend architectures, payment integrations, and role-based access controls. Seeking to leverage technical expertise and strong problem-solving skills to contribute to innovative development projects.

EDUCATION

Bachelor of Arts (Honours) in
Islamic Studies

Eden Mohila College, Dhaka

Expected Graduation: December 2026

Currently in 3rd Year

PROJECT

UrbanVilla – Building Management System

Personal Project
June 2025 – August 2025

Technologies: React.js (Vite), Firebase Auth & Admin SDK, Express.js, MongoDB, Stripe, Tailwind CSS, DaisyUI, React Query, Axios, JWT

Security Implementation: Engineered secure authentication system using Firebase Auth and JWT tokens, ensuring robust data privacy and preventing unauthorized access across all user levels

Payment Integration: Integrated Stripe payment gateway for seamless online rent collection, featuring dynamic coupon discount system and automated rent tracking with intelligent demotion algorithms
